

Minutes of Meeting

Date: Fri, 12 April, 2023

Participants: Tarang Sonj (Testing Team), Saurav Kapadia (Documentation Team)

Venue: C101, HoR Men, DA-IICT.

Agenda: To make sure, as a tester, Tarang Soni understands one-two requirements correctly for the development of black box test cases.

What Transpired:

- Tarang tried to understand and analyse the first two requirements with the help of Saurav once again, to make sure, he understood it correctly.
- While doing so, they identified a need for further clarification of the requirements from other group members.
- Specifically, the participants need to get the following clarifications from other Team members:

1. The flow for Employee user and Manager User Login, i.e. what action on which screen would lead the Employee user and the manager user to the login screen from other group members.

2. What will be the next screen user would see after successful login. (for both Employee level and Manager level employees)

3. How will employee register themselves.

4. The specifications for an Employee profile and a Manager profile.

5. Will there be maximum number of paid employee leaves?

This will be proposed as a part of agenda for our next SCRUM meeting.
